
Chapter 5

ENGINEERED WOOD PRODUCTS

Listing by BCAR

Engineered wood products are listed under a service designated as *Listing by Building Components Acceptance Report (BCAR)*. Engineered wood products include laminated veneer lumber (LVL), parallel strand lumber (PSL), laminated strand lumber (LSL), wood rimboard, wood I-joists and glue-laminated beams. The description of product(s) or construction and information are referenced in the current BCAR. The PFS certification mark identified on the PFS stamp on the said product(s) is evidence that the manufacturer is under contract for trademarking and follow-up inspection service.

LVL, PSL and LSL are evaluated for conformance under ASTM D 5456, *Standard Specification for Evaluation of Structural Component Lumber Products*. Wood rimboard is also evaluated for conformance to ASTM D 5456 (if design values are published). Wood I-joists are evaluated for conformance under ASTM D 5055, *Standard Specification for Establishing and Monitoring Structural Capacities of Prefabricated Wood I-Joists*. Glue-Laminated Beams are tested for conformance with ANSI/AITC Standard A190.1-1993 for *Structural Glue-Laminated Timber*.

Note: Where a superscript number 1, 2 or 3 (^{1,2,3}) appears after the client's listing in the following pages, please refer to Page 2 of the Table of Contents for a written explanation.
